Technical Specification

- Speed:Variable 1-40m/min
- Motor:Stepper motor, microprocessor controlled
- Label width:Max 120mm or 200mm
- Min. label size:15mm x 15mm
- Label Detection:.....Fixed fork p.e. cell or clear label sensor
- Label Roll:300mm diameter
- Label core:.....45mm or 76mm ID
- Electrical supply:.....220/240V. AC 50/60Hz
- Memory capacity:25 labels stored with Alpha/Numeric display
- Weight:Approx 14kg excluding control box

Options:

- Max 76m/minute linear speed
- Encoder for automatic speed following/ label position
- 50 label programmable memory
- End of roll alarm/Warning light
- Blow-on unit
- Powered Dispensing Edge
- Hot foil or Thermal printers
- Bar code and vision system interface

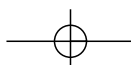

Full range complete labelling systems for Wrapround, Front & Back, Top and Top/Bottom, Print and Apply requirements. Cross Web labellers, Film Labellers, Bespoke specialist applications.
