9232 inkjet ■ ■ ■

New to the 9000 series is our 9232 inkjet printer which prints high quality date codes, logos, alphanumeric text, 1D and 2D barcodes and other product and traceability information onto a wide range of substrates.

The 9232 delivers optimal marking and coding management, thanks to improved cost control, reduced waste, eco-friendly ink options and enhanced day-to-day printing.

- Full 18 month warranty*
- New 7" colour touch-screen for quick set up
- Real time access to availability which shows machine status, ink usage and maintenance procedures
- Longer life cartridges which can be changed without mess and without halting the coding operation
- RoHS-compliant Ketone-free and MEK-free inks available
- Manufactured from 80% recyclable materials
- Power consumption is reduced and limited to a maximum of 60VA
- Print speeds of up to 6.6metres/sec for high speed coding
- Font height of up to 32 dots
- Compact stainless steel printhead with toughened umbilical to withstand the harshest of factory conditions
- Table top or wall mountable

Recommended for manufacturers of:

- Food Products
- Beverages
- Pharmaceuticals
- Electronics
- Cabling and Extrusions
- Aerospace and Automotive Components
- Cosmetics and Toiletries
- Household Products
