SmartDate X40 ■ ■ ■

New to the market leading SmartDate range of coders, is the SmartDate X40. The X40 prints variable data onto flexible packaging materials including packaging films, foils and labels.

By factoring in total cost of ownership and the environment into the design of the SmartDate X40, it delivers long term cost control through strong warranties, planet conscious design, greater uptime and enhanced performance on the line.

- New 1,100m ribbon to reduce ribbon changeovers
- New ribbon saving features to minimise waste and stoppage time
- Low air and electrical power consumption
- New intelligent smart chip print head with automatic setup and dead dot detection for high quality printing
- Full 18 month machine warranty**
- High quality 300dpi printing
- Low power and air consumption
- Zero preventative maintenance visits thanks to new robust features including; direct ribbon drive and improved cassette design which contains no wear parts
- Unprecedented reliability with real time access to availability rate via the colour touch screen user interface
- Availability rate of 99.6% without intervention due to no wear parts

Recommended for manufacturers of:

- Food Products
- Cosmetics and Toiletries
- Pharmaceuticals
- Household Products
- Electronics
