

Company Profile:

Shalam UK is a leading plastic packaging manufacturer based in Basildon, Essex. We are part of the Shalam Packaging group with manufacturing sites in Israel and South Africa and now the UK.

Shalam Packaging was established in 1976 and is privately owned. We

We supply plastic packaging solutions to leading manufacturers in the food, chemical, coating and detergent industries.

work with international blue chip brands as well as with small local

manufacturers, offering all our clients the same high product quality and customer service.

Shalam UK was established in 2009 to allow Shalam to service its growing UK market. The company moved to a two acre site in Basildon, purchased new inject moulding machines, introduced advanced IML systems, and developed new moulds to expand the product range.

This investment and the efficiencies of being an international group allow us to offer our clients excellent customer service and highest quality product at competitive prices.

Local and International:

Located in the South East of England, a short distance from the UK main ports, we are perfectly located to service clients from around the world.

Step 1: The robot picks up a label and leads it to the mould, charging it with an electrostatic charge.

Step 2: The labels is fed into the mould and positioned inside it with the static charge holding it in its place. Plastic is injected to the mould under the label, moulding it into the plastic.

Step 3: the finished product is removed again by the robot. The result is sharp and scratch resistant label.

Plastic Packaging Solutions

Introducing advanced Inject Moulding Technology

In our new UK production site we have incorporated over 40 years of experience in plastics manufacturing and employed the latest inject moulding technologies and IML robotics.

Ice cream

Shalam Packaging has years of experience in serving the ice cream industry and is a trusted supplier of international brands as well as many local dairies. Shalam UK manufactures ice cream containers for both retail and trade use with a variety of IML options. An ever expanding range gives our clients a wide selection of sizes and shapes. Containers are freezer grade, suitable for storing at -25 Celsius and carry tamper evidence seals.

Tubs

Shalam UK offers a range of standard tubs for the food industry. The tubs are suitable for salads, sandwich fillings, dairy products etc. and are available with different colours to suite our clients' colour coding systems. Tubs carry tamper evident seal and are made of food grade materials.

Buckets

Our wide range of buckets is used by the chemical, coatings, food, and detergent industries. The range includes buckets from 1 litre up to 20 litres, made of food grade materials and carry tamper evident seals to protect the content. IML decoration is available on the buckets. All buckets are held in stock and are ready for delivery within short lead times. We can provide the buckets and lids in any colour required, with metal or plastic handles. Wet wipe inserts on lids are also available.

Investment in Technology gives us a competitive edge in the market. It allows us to deliver high quality products and customer service with cost saving efficiency. It enables us to quickly adjust to our clients' needs, be flexible and effective in our account management.

Food Standard Accreditation: Shalam UK holds BRC accreditations category 1. Quality, cleanliness, traceability and staff training are assured through strict adherence to guideline and procedures, supervised by QA management. We welcome audits by our clients.

Tool Room: Shalam UK in-house tool room assures our customers the continuity of supply. We maintain and repair our moulds on-site and ensure our customers are not interrupted when something goes wrong. Our engineers also make our moulds for us so we are confident of their quality and sustainability.

Bespoke Solutions: our design team and engineers can develop bespoke solutions. Be it a unique container to make your product stand out, a special feature on the lid, a giveaway toy or any other plastic product where inject moulding would be a solution. We will work with you to deliver any project from start to finish.

Recycling: At Shalam UK we regrind and recycle our scrap products, putting them back into the manufacturing process lowering our impact on the environment. The regrind material is available to our customers at a reduced cost and you can also mention the use of recycled material on your containers.
