

# Automatic Filling Lines

We design and build high quality filling production lines to suit a wide variety of food and liquid products and container types and size.

Whether you're a start-up company, cottage industry or large multi-national food production plant, we can manufacture and supply semi or fully automatic filling lines to suit your specific production needs.

- Standard or bespoke design
- Suitable for producing “wet” based products - hot or cold liquids, semi-liquids, suspended solids
- Suitable for depositing products into jars, bottles, ready meal trays, foils, pots, tubs and buckets
- Turnkey management projects available
- Comprehensive guarantee and full after sales support
