

Bespoke Depositors / Filling Machines

We can work with you on a bespoke basis to design and build a semi or fully automatic, single or multi-head, low or high level filling machine that meets your exact food production demands. Tell us what you need and we'll build it.

Riggs Autopack's bespoke depositors and filling machines can be supplied with the following options to suit your food production needs -

- Semi or fully automatic
- Mobile or fixed frame
- Single or multi-head dispensing
- Low or high level mounted
- Stand-alone or conveyor filling
- Mini-fill, standard or maxi-fill pump options
- Hopper feed or linked directly to holding tanks

Standard features of our filling machinery include -

- Almost 40 years design and build experience
- Designed and manufactured in-house at our Lancashire factory
- High quality, robust construction from 316 food grade stainless steel
- Pneumatically operated, requires compressed air supply
- Suitable for depositing hot or cold liquids, semi-liquids, suspended solids
- Operator friendly, built to stringent health & safety standards
- Hygienic, easy to clean, quick to strip down, simple to maintain
- Comprehensive guarantee and full after sales support
