

FULLY AUTOMATIC TOP LOAD CASE PACKER

FUNCTION

The machine accepts the product from the line and automatically collates it into the desired pack format. The machine automatically erects a from a flat blank magazine, erects it and positions the open case ready for loading. The collated product is then picked and placed into the erected case before being folded and sealed then ejected from the machine.

FULLY AUTOMATIC TOP LOAD CASE PACKER

Technical Details Electrical Requirements

Supplied with a 3 metre armoured cable complete with 2P+Earth 32 amp plug for connection to a single phase 20 amp supply

Compressed Air

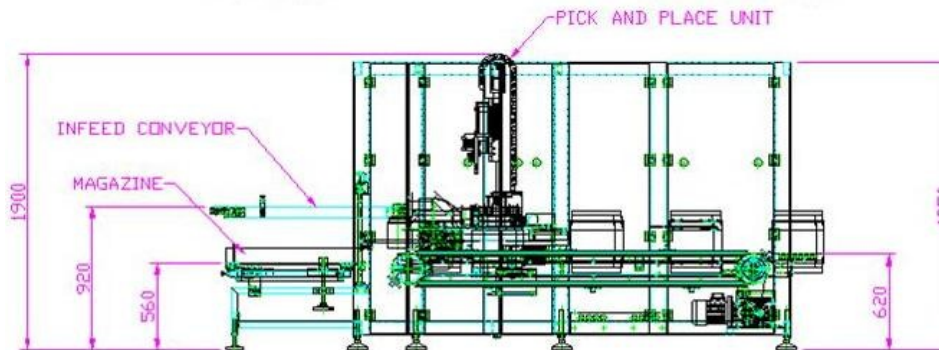

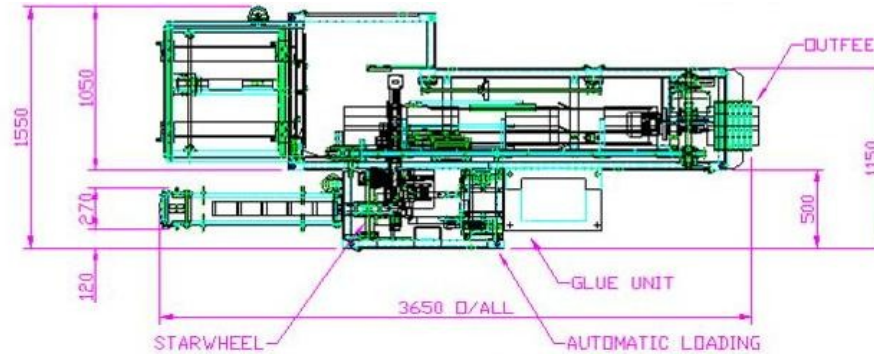

Supplied with filter regulator with 8mm push in fitting for connection to 80psi/5.5 bar compressed air supply

Lifting weight Adhesive Type

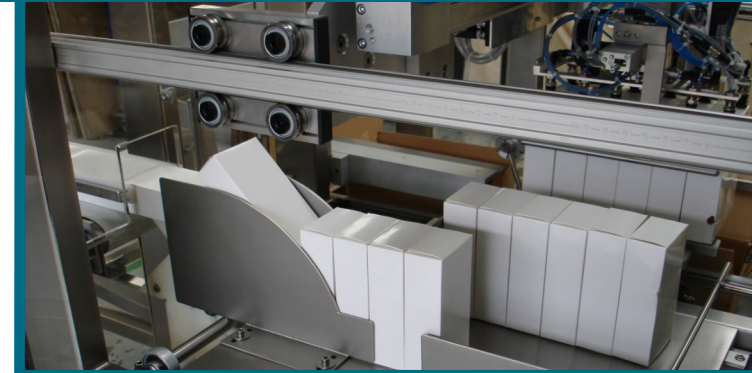

1,500 kilos
Standard packaging grade Hot Melt or Cool melt glue

Typical Layout

(including case packer, product collator, pick and place loader and case sealing)

Alternative specifications available for worldwide applications

MAIN FEATURES

- Quick and simple size change can be completed in less than 15 minutes
- Robust Stainless Steel construction.
- Fully automatic on demand operation
- Fitted with Nordson glue applicator to give clean and efficient case closing (tape option also)
- Low case hopper detection with warning beacon
- ISO maintenance free pneumatics used throughout the machine.
- All major movements utilise maintenance free linear motion drives
- All bearings and gearboxes are sealed for life
- Built to stringent quality control procedures to ensure customer satisfaction
- Available with a wide range of options and specifications to suit individual customer requirements
- Speeds in excess of 20 cases per minute

“We have built our reputation on a number of core values – quality, reliability and innovation. The experience of our technical engineers and their focus on customer satisfaction has created a product range that is simple, robust, hygienic and can be applied to most sectors including food, cosmetics, household goods and healthcare.”
